

PAN-BALTIC INFRASTRUCTURE SUMMIT

28-29 September 2017
Vilnius, Lithuania

INVITATION TO WORKSHOP PPP: BEST PRACTICES AND TENDENCIES”

Pan-Baltic Infrastructure Summit INFRA2017 is the first and the most comprehensive in the Baltics that will explore the Baltic infrastructure and trends in its future development.

The event will bring together infrastructure and energy community – 200 attendees from the Baltic States – policy makers, senior experts, investors, lenders, developers, and infrastructure asset owners for an interactive discussion on the latest infrastructure trends and developments in the Baltic region.

Together with Central Project Management Agency a workshop “PPP: best practices and tendencies” is being organized during the conference on the **28th September**. This workshop will gather together PPP experts and everyone interested in this area from Lithuania, Latvia and Estonia to discuss the trends, challenges and most valuable cases of PPP across all three Baltic countries.

Discussion about PPP is vital as it is becoming more and more usual way of agreements on infrastructure development projects. In order to be successful and able to develop infrastructure without support of EU funds and by attracting private investment in the future, today we should gain as much experience as possible and analyze the best practices.

Please see the program attached

Participation in the workshop is free of charge.

Participation in the workshop is financed by European Social Fund.
